Easy to install, easy to customize, easy to use.

# VL FLEX SERIES

**All-in-one / universal / contactless device configuration / all-rounder**

## GENERAL FEATURES

- 52 mm instrument with 1.44" TFT display
- 2 instruments in 1 with dual screen
- Wireless configurable with your smartphone
- Powerless configuration
- Custom alarms setup
- Color bar graphs for visual data display
- 9 different styling rings available

The VL Flex device can easily be configured to be the instrument you need - thanks to its sun-readable 1.44" TFT display embedded into a standard 52 mm instrument housing. The supported analog inputs allow you to directly read from your engine sensors, and the NMEA 2000® or J1939 interface expands this possibility by allowing the device to read from the digital network. The simple but effective graphic design can be set up in a single or dual layout, presenting the data in a clear and intuitive form, while the colored bar graph and the alarm display allow you to visually understand your data.

## CONFIGURATOR SMARTPHONE APP

- To configure the VL Flex, some parameters must be calibrated, like the gauge type, the sensor and its calibration or the warning threshold. This is possible through the »VL Flex Configurator« smartphone App.
- A simple and detailed explanation of the configuration process is also available as in-app instructions.
- Thanks to the passive embedded NFC receiver, the VL Flex 52 can be configured without power supply.
